Foresight

AI for Operations

Bottlenecks spotted before they bite, jobs routed automatically and stock that reorders itself — operations that run themselves while your team improves them.

A TYPICAL DAY

- **Monitor workflows** and flag bottlenecks in real time.
- **Auto-assign and route jobs or tickets** to the right person or team.
- **Track stock and reorder automatically** before you run out.
- **Optimise scheduling and production** against demand.
- **A live operations dashboard** — throughput, SLAs and exceptions at a glance.

EVERY MONTH

- Capacity and demand planning
- Supplier performance and procurement analysis
- Process-improvement insights from the data
- SLA and KPI reporting

EVERY YEAR

- Operational strategy and scenario planning
- Supplier contract reviews
- A continuous-improvement roadmap

STOP OUTSOURCING — DO IT IN-HOUSE

USUALLY OUTSOURCED	NOW IN-HOUSE WITH AI
Process consultants	**AI process mining on your own data**
Demand-planning services	**AI forecasting**
Procurement consultants	**AI supplier and spend analysis**

How: it starts with our AI Readiness Audit — a “day in the life” of your team to find the handful of tasks AI saves the most time on — then Microsoft Copilot and custom AI agents, set up securely with governance built in.
