Foresight

AI for Safeguarding

Concerns logged and triaged the moment they arise, patterns surfaced early and records kept audit-ready — so safeguarding leads spend their time where it matters: with people.

A TYPICAL DAY

- ✓ **Log and triage concerns** the moment they're raised, routed to the right lead.
- ✓ **Surface online-safety and monitoring alerts** for human review.
- ✓ **Spot patterns** across incidents and records that a busy team might miss — flagged, never actioned automatically.
- ✓ **Route and track referrals** and follow-ups so nothing is lost.
- ✓ **Keep contemporaneous, secure records** that are always audit-ready.

EVERY MONTH

- ✓ Safeguarding reporting and trend analysis
- ✓ Track training and compliance
- ✓ Audit records and actions

EVERY YEAR

- ✓ Prepare for safeguarding audits and inspections
- ✓ Review policies against the latest guidance
- ✓ Review DBS and single central record

STOP OUTSOURCING — DO IT IN-HOUSE

USUALLY OUTSOURCED	NOW IN-HOUSE WITH AI
Monitoring services	**AI content and activity monitoring, with your DSL in control**
Compliance-tracking services	**AI records, reminders and audit trails**

How: it starts with our AI Readiness Audit — a "day in the life" of your team to find the handful of tasks AI saves the most time on — then Microsoft Copilot and custom AI agents, set up securely with governance built in. **Note:** This is the big one: AI only monitors, flags, routes and records. Every safeguarding judgement and decision stays firmly with your trained Designated Safeguarding Lead and team, in line with KCSIE and data-protection law. We build it that way on purpose.
